geophysics is the physics of the earth central to the earth sciences today it encompasses areas such as seismology volcanism plate tectonics gravitational anomalies and the earth's magnetic field present and past as captured in rocks all of which give clues to both the structure and the working of the earth in this very short introduction william lowrie describes the internal and external processes that affect the planet as well as the principles and methods of geophysics used to investigate them he explains how analysis of the seismic waves produced in earthquakes reveals the internal structure of the earth geophysicists have established that the greatest source of energy powering geological processes is the earth's internal heat deep inside the earth the temperature is high enough to produce a fluid outer core of molten iron it is the motion in this molten iron layer that produces the earth's magnetic field which shields the planet against harmful radiation from the sun and outer space and thus makes the planet habitable lowrie describes how the magnetic field also magnetizes rocks during their formation leaving a permanent record of the ancient field and its direction that geophysicists have learned to use to interpret past motions of the continents and tectonic plates from analyses of earth's deepest interior to measurements made from earth orbiting satellites lowrie shows how geophysical exploration is vitally important in the search for mineral resources and emphasizes our need to understand the history of our planet and the processes that govern its continuing evolution about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

climate change is still arguably the most critical and controversial issue facing the world in the twenty first century previously published as global warming a very short introduction the new edition is now climate change a very short introduction reflecting an important change in the

terminology of the last decade in the third edition mark maslin includes crucial updates from the last few years including the results of the 2013 ipcc fifth assessment report the effects of ocean acidification and the impact of changes to global population and health exploring all of the key topics in the debate maslin makes sense of the complexities climate change involves from political and social issues to environmental and scientific looking at its predicated impacts he explores all of the controversies and also explains the various proposed solutions about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

why can we sometimes remember events from our childhood as if they happened yesterday but not what we did last week how are memories stored in the brain and how does our memory change as we age what happens when our memory goes wrong and how easy is it for others to manipulate our memories this fascinating very short introduction brings together the latest research in psychology and neuroscience to address these and many other important questions about the science of memory revealing how our memory works why we couldn't live without it and even how we may learn to remember more book jacket

where did we come from why are we here is there a god in our modern world many people yearn for answers to these most fundamental of life's questions having become disillusioned with trite explanations and troubled by narratives that deny their intuitive spirituality beginning with some of our most ancient ancestors wakan tanka traces the evolution of humanity through the ages citing paleontological and archaeological discoveries along with recent genetic evidence it recounts how mankind evolved from the earliest mammals into anatomically and behaviourally modern humans wakan tanka describes how human culture and spirituality evolved in concert with anatomy showing how humankind has since very ancient times had an instinctual moral sense it discusses

how our spirituality has given us an appreciation for both the aesthetic and divine aspects of life as reflected in our cultures and artistic endeavours by comparing philosophical and religious views of creation with modern scientific theory wakan tanka reaches the conclusion that rather than conflicting these views are remarkably similar and equally valid ways of describing the same reality indeed our scientific knowledge and spiritual beliefs can be harmonized providing us with a deeper understanding of ourselves of creation and of life s purpose

the first encyclopedia in the field the international encyclopedia of ergonomics and human factors provides a comprehensive and authoritative compendium of current knowledge on ergonomics and human factors it gives specific information on concepts and tools unique to ergonomics about 500 entries published in three volumes and on cd rom are pre
